

# SUCCESS STORY

## TURNKEY® RHINO- RIPPER

**Location** : Bretagne - France

**Application** : Demolition & Public Works

**Machine** : VOLVO EC 350

”

The customer was looking to manufacture a ripper with a locking system that was easy to dismantle and horizontal.

He decided to trust us, after a specific study by the manufacturer.

He decided to work with us and the MMS Boilermaking Company to get a quality tool and a resistant horizontal locking device.

“

*The ripper meets all my expectations.*

*The tooth is self-sharpening, and very easy to install with its horizontal locking system, which is a guarantee of safety.*

”
