TURNKEY® Grizzly - 5 x T5 1535 PR

Bulgaria

Multi-purpose bucket

Hyundai R210 Exca. / 21.7T

CUSTOMER'S OBJECTIVES

Our customer, a familiar user of the FASTKEY® range, was looking for a new, innovative and safe system to replace his bucket equipment. They chose the TURNKEY® Grizzly in size 5. TURNKEY® Grizzly, with its horizontal, rotative and hammerless locking devices, offers to the customer a great ease and safe handling during assembly & disassembly.

” RESULTS

The PR shape has a perfect tooth profile for an excellent soil penetration. This shape is a good compromise between wear and material/penetration. In addition, as the kit is lighter, it offers best quality/price ratio. The teeth have not yet been changed.
