TURNKEY® Grizzly - T8 1545 10° PR

📍 **Location** : Italy

🚧 **Machine** : Hyundai HX330 Excavator - 33T

CUSTOMER'S OBJECTIVES

Our customer was looking for an innovative and safety system with :

- A perfect fitting
- A better soil penetration
- A quick and easy assembly and disassembly
- A precision and ease of use during operations
- Lightweight adapters

🗨️ *We are very satisfied with Feurst products and have been using them for many years.*

Abrasion adapters have a thicker upper leg, providing excellent abrasion resistance. In addition, the PR shape has a good tooth profile, which ensures a strong penetration. This shape is a good compromise between wear material and penetration.
